The human histamine H3 receptor contains the seven conserved hydrophobic domains and specific residues conserved in biogenic amine receptors. The human histamine H3 receptor polynucleotides and polyreptides are used in methods to screen for modulators of receptor activity (claimed). Such agonists and antagonists may prove useful as research tools or may be used as therapeutics to treat disorders directly or indirectly involving histamine receptors (claimed). The characterization of the polynucleotide is useful for forensic analysis, diagnostic applications, and

Histamine, receptor, G-protein coupled receptor; human. neuroprotective; cardiant; antidepreseant; tranguillizer; antiparkinosinian; anorectic; hypotensive; analgesic; antidiabetic; laxative; antiarrythmic; antiulcer; antiallergic; antilnflammatory.
of receptor, identifying and isolating genomic equivalents of receptor and identifying, detecting or isolating mutant forms of the receptor. DNA molecules are also useful in gene therapy for the treatment of inflammation or allergies. The human histamine H3 receptor protein is useful in identifying modulators of the human histamine H3 receptor, which in turn are useful as therapeutic and diagnostic agents

                                                                                                                                                                                                                                         The present sequence is the protein sequence of the human histamine H3 receptor, a novel G-protein coupled receptor. The sequence is predicted from a cDNA clone isolated from a human thalamus cDNA library. It shows at least 254 amino acid identity with the human histamine H3 receptor, 284 with the human histamine H1 receptor, and approximately 254 with the family of biogenic amine H1 receptor, and approximately 254 with the family of biogenic amine G-protein coupled receptors. Histamine H3 receptor cDNA has been expressed in recombinant host cells, which produced active recombinant protein. H3 receptor nucleic acids and proteins can be used to identify modulators of H3 receptor activity or expression useful as therapeutic or lagnostic agents for central nervous system disorders, such as depression, anxiety, psychoses (e.g. hypertensia), tardive dyskinesia, Parkinson's disease, obesity, hypertensian, Tourette's syndrome, sexual dyskunction, drug addiction, drug abuse, cognitive disorders, Alzheimer's disease, semile dementia,
                                                                                                            Novel isolated and purified DNA molecule encoding human histamine H3 receptor protein, useful for identifying modulators of human histamine H3
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                120

The present invention relates to antibodies specific for human histamine receptor protein subclasses H1, H2 and H3. These antibodies prevent histamine binding to the receptors and can be used to prevent and treat allergic reactions and inflammatory diseases. The present sequence is the human H3 receptor
                                                                                                                                                 Human, histamine receptor; H1; H2; H3; antigen; antibody; antiallergic;
antiinflammatory; immunosuppressive; allergy; inflammatory disease.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           AVIVSIFGLCWAPYTLLMIIRAACHGHCVPDYWYETSFWLLWANSAVNPVLYPLCHHSFR

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  The present invention describes antigenic peptides (I) comprising: (a) any one of 1601 sequences (see ABP82019 to ABP83619) of 12-24 amino acids. Also described: (1) an assay for the detection of a particular GPCR or a candidate polypeptide in a sample; and (2) an isolated antibody having high specificity and high affinity or a particular GPCR. (I) can be used as GPCR modulators and in gene therapy. The antigenic peptides for GPCRs are useful in detecting an antibody against a particular GPCR., and in the production of specific antibody against a particular GPCR, and in the production of specific antibody. The peptides and antibodies. The peptides for GPCRs are useful for detecting the presence or absence of corresponding GPCRs. The antigenic peptides for GPCRs and antibodies are useful for diagnosing and designing drugs for creating immune-related diseases, growth-related diseases, call reading immune-related diseases, growth-related disease, call creating immune diseases, immunologial-related disease, call creating immune diseases, immunologial-related disease, or autoimmune diseases, e.g. AlDS, Alzheimer's disease, catheroscall, fungal, protozoan or viral infections, osteoarchritis, osteoarchis, fungal, protozoan or viral infections and acute inflammation, allergies, Crohn's disease, diabetes, graft versus host disease, anxiety, depression, schizohrenia, dementia, mental retardation, memory closs, epilepsy, asthma, tuberculosis, obesity, nausea, hypertension, or hypotension, renal disorders, rheumatoid arthritis, trauma, ulcers, or

This invention describes a novel antibody that is specific for a histamine receptor protein (HRP), especially human, and is able to inhibit binding of histamine to HRP. The antibody is produced by immunisation with an antigenic polypeptide that comprises (i) an extracellular domain (BCD) having a sequence from the first extracellular compress (ii) an extracellular domain (BCD) having a sequence from the Nereminus of the third transmembrane region (TMP) having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a sequence from the second BCL and optionally a TMD having a BCD having a sequence from the second BCL and optionally a TMD having a BCD having a sequence from the second BCL and optionally a TMD having a BCD having a sequence from the second BCL and optionally a TMD having a BCD having a sequence from the second BCL and option from the disclosure of the invention haman histamine
                                                                                 New antibody specific for histamine receptor protein, useful for treating or preventing e.g. allergy or inflammation, also antigens for its
                                                                                                                                                                                                                                                        Claim 2; Fig.2C; 14pp; German.
                                                                                                                                                                           preparation.

The present invention relates to a method of identifying compounds that are agonists of recombinant human histamine H3 receptor protein activity, comprising a compound suspected of being an antagonist of human histamine H3 receptor protein activity with recombinant human histamine H3 receptor protein activity with recombinant human histamine H3 receptor protein. The methods and compositions of the present invention are useful for diagnosing and treating human histamine H3 receptor-related disorders, such as central and peripheral nervous system disorders (depression, anxiety, psychoses, parkinson's disease, Alzheimer's disease, dementia and tardive dyskinesia), asthma, allergy, diabetes mellitus, inflammation, immune, cardiovascular (hypertension, and arrhythmia) and gastrointestinal disorders. The present sequence is the human histamine H3 receptor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         300
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       360
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              61 ADSSLRIQNNFFLLNLAISDFLVGAPCIPLYVPYVLTGRWTFGRGLCKLWLVVDYLLCTS 120

New polynucleotide encoding a human H3 histamine receptor polypeptide, useful for diagnosing or treating disorders associated with or modulated by H3 histamine receptor, e.g. depression, anxiety, obesity, hypertension or diabetes.
                                     420
                                                       The invention relates to splice variants of human H3 histamine receptor polypeptide and their corresponding polynucleotide sequences. The invention is useful in diagnosing or treating diseases or disorders associated with or modulated by the H3 histamine receptor, such as central nervous system disorders (e.g. depression, anxiety, psychoses, Parkinson's disease or Alzheimer's disease), obesity, hypertension, Tourette's syndrome, sexual dysfunction, gastrointestinal disorders (e.g. constipation), drug addiction, cardiovascular or cerebrovascular disorders (e.g. arrhythmia), diabetes, stress, ulcers, asthma, allergy, inflammation and prostate dysfunction. It is also used in gene therapy. The polypeptide is useful for identifying agonists, antagonists or inverse agonists of histamine action at the H3 receptor. The present sequence is human wild-type H3 receptor protein

                                     with a protein appearing as ADD22654, where the protein functions as a main with a protein appearing as ADD22654, where the protein functions as a activity of the human histamine H3 receptor in response to ligand binding. The antibody is useful for detecting and quantifying expression of human histamine H3 receptors, which may be useful for diagnostic, epidemiological or forensic purposes. The antibody is potentially useful in treating diseases such as depression, anxiety, schizophrenia, Parkinson's disease, obesity, hypertension, Tourette's syndrome, sexual dysfunction, drug addiction or drug abuse, cognitive disorders, pain, attacks, obsessive-compulsive behaviour, panic attacks, pain, eating disorders and anorexia, cardiovascular and cerebrovascular disorders, diabetes, constipation, arrhythmia, ulcers, asthma, allergy, inflammation, or prostate dysfunction. The present sequence represents the histamine H3 receptor.
                                                                                                                                                                                                                                                                                                                                                                                             120
                            invention relates to a monospecific antibody immunologically reactive

The present invention describes the use of polypeptides related to urological disorders for identifying a compound capable of treating a urological disorder, identifying a subject having a urological disorder, or treating a subject having a urological disorder. Also described: (1) a method for identifying a compound capable of treating a urological disorder; (2) a method for identifying a subject having a urological disorder; and (3) a method for treating a subject having a urological disorder. The compound has uropathic and cytostatic activities. The polypeptides related to urological disorder is urological disorder, identifying a compound capable of treating a urological disorder, identifying a urological disorder, or treating a subject having a urological disorder. Disorders include urinary incontinence and benign prostatic hyperplasia. The present sequence represents a human urological disorder related protein, which is used in the exemplification of the present
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 180

The invention is useful for identifying compounds that modulate the activity of human histamine H3 receptor. The invention is useful for treating a condition that is mediated by a human histamine H3 receptor in a patient and for treating parkingon's disease, Obseity, Alzheimer's disease, pain, stress, ulcers, constibation and non-insulin dependent diabetes mellitus. The present sequence is a human histamine H3 receptor protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Human, Parkinson's disease; obesity; Alzheimer's disease; pain; stress;
ulcer; constipation; non-insulin dependent diabetes mellitus;
histamine H3 receptor; receptor.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Novel isolated and purified human histamine H3 receptor protein useful for identifying modulators utilized for treating Parkinson's disease, obesity, Alzheimer's disease, pain, stress or ulcers.

New nucleic acid encoding an isolated G-protein coupled receptor useful for treating nervous system related disorders.

Claim 8a; Fig 1; 140pp; English.

The present sequence represents a novel human G protein coupled receptor, termed filh84g5, as deduced from a human cerebellum cDNA clone (see AAX39167). The invention provides human, rat and mouse filh84g5 concerned filh84g5 and antisense human cerebellum cDNA clone (see polymucleotides (including polymucleotides encoding the transmembrane regions of filh84g5 and antisense nucleic acid molecules), expression concerned antibodies, and a method of modulating phosphatidal propeptides and antibodies, and a method of modulating phosphatidal filh84g5 polypeptides can (i) interact with a filh84g5 ligand, such as cactylcholine or carnitine, (ii) interact with a filh84g5 ligand, so realistum channel (e.g. a calcium activated chloride channel or a potassium con channel (iv) modulate cytosolic ion, e.g. calcium concentration, (v) modulate cytosolic ion, e.g. calcium concentration, (v) modulate the release of a neurotransmitter, e.g. cactylcholine or carnitine from a neuron, (vi) modulate a filh84g5 ligand concentration, (v) modulate the release of a neurotransmitter, e.g. cactylty. The products can be used to treat: disorders mediated by corposphatialylinositol turnover, and (vii) modulate phospholipase C actylty. The products can be used to treat: disorders system related conspirated disorders, e.g. amnesia, apraxia, agnosia, amnestic spatial disorientation, Kluver-Bucy syndrome, Alzheimer's related memory constrained disorientation, Ruver-Bucy syndrome, Alzheimer's related memory constrained and learning disability; disorders affecting consciousness such as visual hallucinations, perceptual disturbances or delerium associated with Lewy body dementia, apraxia, agnosia, amnestic suffective consisted such as REM sleep abnormalities in patients suffective depression, paradoxical alsep abnormalities in patients suffective depression, paradoxical alsep abnormalities in patients suffective disorders and paramined and disorders affecting pain generation mechanisms e.g. pain related to irritable bowel syndrome or chest pain; movement disorders e.g. Parkinson's disease related movement disorders; eating disorders e.g. insulin hypersecretion related obesity or drinking disorders, e.g.

The present sequence represents human muscarinic acetylcholine receptor 6

(mACHR-6), which is a member of the G family of proteins. mACHR-6 has
antiparkinsonian, noctropic, neuroprotective. neurologic, antidiabetic
antidepressant, antiarrhythmic neuroprotective. neurologic, antidiabetic
antidepressant, antiarrhythmic neuroprotective. The mACHR
c protein, is capable of modulating the effects of a G-protein coupled
c receptor (GPCR) ligand such as acetylcholine or an acetylcholine like
molecule such as carnitine, e.g. by modulating phospholipase C
signalling/activity. Products from the present invention can be used for
treating disorders mediated by abnormal mACHR-6 protein activity such as
c rereptor system related disorders disorders affecting
c pain generation mechanisms such as pain related to irritable bowel
c syndrome or chest pain, movement disorders, cardiac muscle disorders, and
disorders, smooth muscle related disorders, cardiac muscle disorders, and
c disorders such as xerostomia or diabetes mellitus. The
products can also be used for detection, diagnosis and drug screening.

The present invention describes aminoazetidine, pyrrolidine and piperidine derivatives (1), which are used for the treatment of disorders and diseases related to the histenine H3 receptor. (I) have anorectic, and diseases related to the histenine H3 receptor. (I) have anorectic, and anotopic, antidiabetic, antiallerain, antiemetic, antidiate, ontidiate, antilipaemic, cardiant, osteopathic, antiarthritic, auditory and cytostatic activities. (1) can be used for treating and/or preventing diseases and disorders related to H3 histamine receptor e.g. overweight or obesity, eating disorders (e.g. bullimia and binge eating), impaired glucose tolerance, type 2 diabetes, allergic rhinitis, ulcer, anorexia,

Alzheimer's disease, narcolepsy and attention deficit disorder, for the delaying or preventing the progression from non-insulin requiring type 2 diabetes. for reducing weight and subpressing appetite or satisfy induction. (I) can also be used for treating dementia, motion sickness, vertigo, irritable bowel syndrome, gall bladder disease, cancer of breast, prostate and colon, narcolepsy, attention deficit disorder, airway disorders (e.g. asthma), dyslipidaemia, coronary heart disease and osteoarthritis. (I) have high and selective binding affinity to the histamine H3 receptor. The present sequence represents the human histamine H3 receptor protein, which is given in the exemplification of the present invention
                                                                                                                                                                                                                                                                                                                                                                                                                            9

Muscarinic acetylcholine receptor - pig

C;Species: Sus scrofa domestica (domestic pig)

C;Sacession: A24225

R;Kubo, T.; Fukuda, K.; Mikami, A.; Maeda, A.; Takahashi, H.; Mishina, M.; Haga, T.; Hage
Nature 323, 411-416, 1986

A;Tille: Cloning, sequencing and expression of complementary DNA encoding the muscarinic

Muscarinic acetylcholine receptor M2, glandular - pig
Mylernate names: muscarinic acetylcholine receptor III
Cispecies: Sus scrofa domestica (domestic pig)
Cibate: 30-Sep-1989 #sequence_revision 30-Sep-1989 #text_change 09-Jul-2004
CiAccession: S01114
RiAkiba, I.; Kubo, T.; Maeda, A.; Bujo, H.; Nakai, J.; Mishina, M.; Numa, S.
FEBS Lett. 235, 257-261, 1988
A;Title: Primary structure of porcine muscarinic acetylcholine receptor III and antagonic A;Reference number: S01114; MUID:88296835; PMID:3402600
A;Accession: S01114
